# Sounds of Design

**Sounds of Design** is an immersive installation presented during **Milan Design Week 2026**, exploring the relationship between sound, space and material.

Set within a 90 sqm gallery inside a historic Milanese palazzo once dedicated to musical production and publishing, the project draws from the building's legacy to reactivate it through a contemporary lens. What was once a place for composing, archiving and imagining sound becomes the foundation for a new sensory experience.

Curated by **Golden Side**, with cultural partner **Level Shoes**, Sounds of Design brings together a selection of **12 designers and brands** whose work engages with materiality, form and perception. Each contribution becomes part of a broader spatial composition, where objects, textures and structures interact with a carefully constructed soundscape.

For this occasion, the artist **Neuf Voix** presents a series of sound compositions that blend audio derived from the production processes of the exhibited objects with musical elements. These pieces will be played at specific moments throughout the day, creating an immersive experience in dialogue with the installation.

In parallel, the daily music selection will be curated by DJ **Antenna Paradisco**, contributing to the overall sonic atmosphere of the space.

The cultural partnership with **Level Shoes**, a reference point in contemporary fashion culture, opens a dialogue between design, fashion and material experimentation, further expanding its cultural ecosystem. Through this convergence of disciplines, Sounds of Design proposes a new way of engaging with design, not just to be seen, but also to be heard and experienced..

**Sounds of Design will take place at Via Legnano 14, Milan, from April 21 to 26, 2026, and will be open daily from 10 AM to 7 PM.**

**Neuf Voix** is a composer and sound artist whose work encompasses electronic and instrumental composition, live performances, and the creation of original sound works and diffusion structures. Most of his works are conceived by exploiting the qualities of multichannel sound projection to explore the deeper aspects of acoustic perception. Recurring elements in his compositions include sound synthesis, reworking of concrete sound samples and acoustic spatialization. Neuf Voix's music emerges from the theories of 20th-century avant-garde music and composition, with interests in microtonality, dodecaphony, spectralism, experimentalism, concrete music and orchestral music. His compositions are characterized by a pronounced interest in alternative notation, timbral investigation, and the coexistence of multiple composition techniques within the same context.

For *Sounds of Design*, Neuf Voix develops the sound design of the exhibition, shaping its auditory dimension as an integral part of the spatial experience. On this occasion, he presents for the first time a series of hi-fi speakers and a custom console, entirely designed and produced by the artist. Conceived as both functional and sculptural elements, these pieces define a dedicated listening environment where sound becomes physical, architectural and immersive, establishing a direct dialogue between composition, space and material.

## ABOUT LEVEL

Founded in Dubai in 2012, Level Shoes is the global authority in footwear, redefining experiential luxury through a seamless omnichannel journey. Its Dubai Mall flagship is a vibrant hub where style, community, and creativity intersect, hosting exclusive launches, limited-edition drops, and curated edits. Through its fully integrated e-commerce platform and app, over 250 of the most sought-after and emerging designers are available across women's, men's, and children's shoes and accessories, alongside a pre-loved selection. Supported by multilingual Customer Care and Personal Shopping teams, Level Shoes delivers worldwide, shaping the future of retail.

As cultural partner of Sounds of Design, Level Shoes contributes to expanding the project's cross-disciplinary dimension, introducing a natural connection between design, fashion and sensory experience. Within the installation, this dialogue materializes in the listening lounge, a space designed for a more intimate engagement with the project's sonic dimension.

# GOLDEN SIDE

## Sounds of Design

ABOUT GOLDEN SIDE

Golden Side designs presence. From concept to execution, we curate ideas, materials and collaborations that feel intentional, contemporary and rooted in craftsmanship.

Golden Side was founded by **Giulia Zanetto** and **Stefano Caraceni**, two eclectic partners in business drawn to the meeting point of luxury, design and digital innovation.

After experiences in Cartier, Moët Hennessy and other high-end brands, they decided to build their own vision: a studio that blends Italian taste with modern creativity and a forward-looking digital approach.

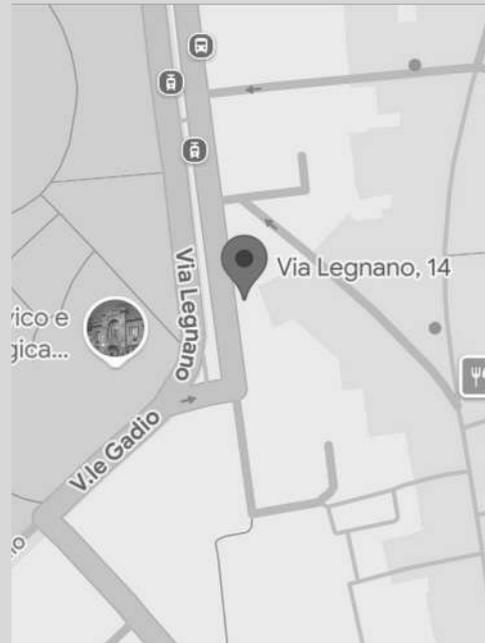

**Sounds of Design** is a project conceived and curated by Golden Side, developed as an immersive exploration of the relationship between sound, space and material. The installation reflects the studio's approach to creating environments where different disciplines converge, shaping a cohesive experience that unfolds across design, music and spatial perception. Presented during Milan Design Week 2026, the project embodies Golden Side's vision of design as a cultural and sensory experience.
