CABRINI GLOBAL HEALTH COMMISSION

ACTIVITIES

- Design, implementation of self-assessment tools and external review, and support for ministries of health.
- Supporting health ministries in self-assessment processes.
- Research project with the University of Milan on women's health and HPV prevention.
- Academic internship program in collaboration with other institutions.
- Support for fundraising initiatives.

FUNCTIONS OF THE COMMISSION

Technical/Clinical

- Improving the quality of healthcare in the ministries of health of the Institute of the Missionaries of the Sacred Heart of Jesus.
- Support to ensure the sustainability and quality of programs and interventions based on economic, geographic, and cultural realities.

Research

- Using the most effective scientific methods and tools to design programs and develop effective decision-making processes.
- Active advocacy to achieve broader impact, using knowledge gained through direct service delivery.

Training (capacity building)

- Support technical preparation and training.
- Training focused on a "new culture of health" and the Cabrini approach in the healthcare sector.

Role of the Commission

- Supporting the General Superior and her Council in leadership, discernment, and decision-making.
- Support ministries sponsored by the Missionary Sisters of the Sacred Heart of Jesus.
