

OVERPLAN FOR DÉsirÉE
AN ISLAND-LIKE, MODULAR SOFA

DESIGNED BY MATTEO THUN & ANTONIO RODRIGUEZ

MODULARITY

Modular structure with clean lines and thin legs, creating an effect of extreme lightness. Easy to fit in every setting, thanks to a wide range of fabrics, colors and a functional set of hidden metal accessories covered in leather. All this makes Overplan more than a sofa.

HIDDEN ACCESSORIES

It's an island, a cozy heart of the house or the perfect place to socialize. To simply relax on its comfortable upholstered seating with cushions and backrest emphasized by elegant leather piping in contrasting color or choose the favorite book just picked up from a very smart wooden shelf, covered in leather, perfectly integrated in the structure. A practical hidden coffee table can be positioned sliding from the lower part of the seat, while a small shelf has been developed in the backrest that can be used as a desk, recreating a perfect work-station.

All these functions in one sofa, playing with the accessories: this is Overplan's young soul and concept.

DETAILS

Modular sofa with metal structure and legs in opaque bronze, upholstered in fabric and piping in leather. Hidden accessories in metal covered in leather.
